Index of International Publications in Aerospace Medicine

FOREWORD

This manuscript, revised as of July 2001, contains a comprehensive listing of international publications in Clinical Aerospace Medicine, Operational Aerospace Medicine, Aerospace Physiology, Environmental Medicine/Physiology, Diving Medicine/Physiology, Aerospace Human Factors, as well as other important topics directly or indirectly-related to aerospace medicine. This bibliographic guide is divided into six major sections: I) Open Publications in General Aerospace Medicine, II) Government Publications in General Aerospace Medicine, III) Publications in Other Topics Related to Aerospace Medicine and Aerospace Human Factors, IV) Proceedings From Scientific Meetings, Conferences, and Symposiums in Aerospace Medicine and Psychology, V) Journals, Newsletters, and Bulletins in Aerospace Medicine and Aerospace Human Factors, and VI) On-line Computerized Databases Containing Bibliographic Information in Aerospace Medicine and Related Disciplines.

With respect to the type of publications included in this bibliographic guide, our primary objective was to provide the reader with detailed information about "books." Books were selected because they offer a comprehensive coverage of a general area of interest, and they represent excellent tools for structured learning and consultation. On the other hand, article citations from periodical publications (journals, bulletins, and newsletters) were kept to a minimum because their coverage is usually limited to specific issues. Articles are very useful to colleagues who have an adequate understanding of a given general discipline and wish to keep up with the latest developments in the various areas that confirm such a

discipline. However, the inclusion of thousands of individual article and technical report citations was beyond the scope of this bibliographic guide. For those colleagues interested in periodical publications, our guide includes a section containing general information on journals, bulletins, and newsletters in Aerospace Medicine and Aerospace Human Factors, indicating which are currently being published on a regular basis and which have been discontinued. Citations to technical reports are included in the numerous indices, bibliographies, serial publications, and on-line databases that are listed throughout the guide.

We believe this guide will be useful as a primary source of consultation for bibliographic information, especially to those colleagues who are in their formative years and to those who do not have easy access to computer-aided literature search systems.

This guide was not intended to be an all-inclusive listing of every publication in aerospace medicine available worldwide. Obviously, there are other publications that we are not aware of due to limitations in our literature search methodologies. Therefore, we take this opportunity to encourage readers to let us know of any publication (old or recent) not listed in this guide that should be included.

Finally, it is important to establish that this bibliographic guide does not constitute a recommendation or an endorsement of any of the publications listed herein. The merits and limitations of each publication should be judged by the reader, keeping in mind that some of these publications should be evaluated as historical documents and not as up-to-date consultation sources.

CONTENTS

I)	OPEN PUBLICATIONS IN GENERAL AEROSPACE MEDICINE -----	1
II)	GOVERNMENT PUBLICATIONS IN GENERAL AEROSPACE MEDICINE -----	5
III)	PUBLICATIONS IN OTHER TOPICS RELATED TO AEROSPACE MEDICINE -----	6
	Aeromedical Certification and Standards-----	6
	Operational Aerospace Medicine -----	7
	Aeromedical Care and Air Ambulances -----	9
	Aerospace Medicine for Flight Crews -----	10
	Medical Aspects of Aviation Safety and Accidents -----	11
	Aviation and Environmental Physiology -----	13
	Space Physiology, Medicine, and Human Factors-----	17
	Diving Physiology and Medicine -----	24
	Aerospace Human Factors and Psychology -----	27
	General Human Factors and Psychology -----	31
	Aerospace Medicine History -----	33
IV)	PROCEEDINGS FROM SCIENTIFIC MEETINGS IN AEROSPACE MEDICINE AND PSYCHOLOGY -----	35
V)	JOURNALS, NEWSLETTERS, AND BULLETINS IN AEROSPACE MEDICINE AND AEROSPACE HUMAN FACTORS -----	37
VI)	ON-LINE DATABASES CONTAINING BIBLIOGRAPHIC AND REGULATORY INFORMATION IN AEROSPACE MEDICINE AND RELATED DISCIPLINES -----	40

INDEX OF INTERNATIONAL PUBLICATIONS IN AEROSPACE MEDICINE

I) OPEN PUBLICATIONS IN GENERAL AEROSPACE MEDICINE
